

Call for experts in paediatric clinical trials

conect4children ([c4c-S \(conect4children.eu\)](https://c4c-S.conect4children.eu) and [conect4children is a pan-European clinical trial network](#)) invites you to apply for **membership of a Clinical Expert Group** in your area of expertise in paediatric drug research.

c4c is an pan-European network with the aim of facilitating the development and availability of new medicines for babies, children and young people through our large collaborative paediatric network. One goal of the network is to deliver [expert advice](#), to improve child health and paediatric medicine development.

[Groups of Experts](#) (methodological, clinical, and [parents/patients](#)) were set-up in 2019 to provide advice services to individual requests from c4c industry and academic sponsors.

Currently we are now expanding our network of experts and are seeking experts interested to be part of **Clinical Expert Groups** to provide advice. Depending on the nature of the incoming advice request, experts from the relevant expert group will be selected to form an ad-hoc advice group to provide the advice.

This call is for clinical experts. A separate call is being launched for methodology experts.

Who should apply?

Paediatricians who are practising in their respective paediatric field for more than 5 years and have an interest in paediatric clinical trials. Experience as an investigator in academic or industry led clinical trials or advised for pharmaceutical industry and/or regulatory agencies would be an advantage but is not a requirement. Please also look at the suggested criteria for experts down below. We actively encourage paediatricians with strong clinical expertise in a specialized field, mid-career, including all regions of Europe to apply.

Criteria for experts (not all criteria have to be met):

- Relevant expertise in a specific drug development research field of > 5 years and is currently active in the field of expertise.
- Knowledge in paediatric clinical trials and the regulatory process (e.g. been lead or co-lead investigator, member of protocol writing committee in academic or industry driven clinical trial).
- Capacity to provide a minimum of 2 expert advice requests yearly.
- Actively taking care of patients in the appropriate therapeutic area.

We aim for diversity, including representatives from different career levels, genders, European regions and from a wide range of clinical subspecialties. If you are a clinician specialized in a very specific patient population, but with less experience in research, we still invite you to apply.

We are looking for core and/or extended experts with a diverse background.

Core experts will, as well as providing advice, be involved in group meetings, and will support the lead and c4c in developing the expert group network and collaboration on quality improvement activities. Extended experts will mainly be involved in the advice services but are not expected to contribute to other activities.

In your application, please indicate whether you would prefer to be a core or an extended expert.

Depending on the number of applications received, we may carry out a selection process of received applications. This does not mean we will not need you in the future, as requests may be very specific. Hence by applying you

agree that we keep your contact details in our database (for 5 years) so that we can approach you at a later stage. Data will be stored in compliance with the c4c-S privacy and data protection policy.

What are you expected to do?

Core & extended experts

1. Be available to provide advice on clinical aspects of paediatric clinical trials for at least two projects per year in the *ad hoc* advice group. When requests for advice are received by c4c the appropriate experts will be selected to form these ad hoc advice groups (one for each advice request). These groups may also contain methodology experts and patient/parents.
2. Your expertise may be requested (but not limited to) on following issues: is the study design (incl. Assessments, targeted population, endpoints etc) the most appropriate, up to date, innovative, meaningful and feasible and/or is this study design ethically sound. You may also be involved in Paediatric Investigational Plans (PIPs) by advising c4c industry partners on their paediatric plans or responses to regulatory agency comments. We would like to emphasize that site feasibility issues are not the task of clinical expert groups.
3. Be available for 3 years as expert, with the possibility to prolong if both parties agree.

Core Experts only

Contribute to the development of the expert group in your area of expertise. By working together with the expert group lead on quality improvement action items, building/expanding the network, gain visibility for c4c, build collaborations with already existing networks etc. A meeting with the core experts of the expert group will be organised if needed to support these activities. As a core expert you are expected to participate to these meetings.

How can you benefit?

1. Involvement in the design of paediatric trials
2. Opportunity to work with your Expert Group on (White) papers
3. Expand your network and visibility
4. Opportunity to follow the following courses eg (1) concepts of Paediatric Investigational Plan (2) Paediatric GCP

Which groups can I apply for:

<i>Name Expert Group</i>	<i>Expert Group Lead</i>	<i>Specifics requested (if applicable)</i>
Adolescent Medicine	Carmen Moreno	
Cardiology	Wim Helbing and Estelle Naumburg	
Dermatology	TBD	
Ear, Nose, and Throat (ENT) (<i>new</i>)	TBD	
Endocrinology & Diabetes	Felix Reschke	
Gastroenterology & Hepatology	TBD	
Genetics/ Cell therapy/ (<i>new</i>)	TBD	
Infectious Diseases & Vaccinology	Theoklis Zaoutis	
Intensive Care	Matthijs de Hoog and Tuuli Metsvaht	
Lactation/Nutrition (<i>new</i>)	TBD	

Metabolic Diseases	Maurizio Scarpa	
Neonatology	Karel Allegaert	
Nephrology	Franz Schaefer	
Neuromuscular Diseases	Volker Straub	
Neuroscience & Epilepsy	Helen Cross	
Oncology	Gilles Vassal	
Ophthalmology (<i>new</i>)	TBD	
Psychiatry	Sara Carucci	
Respiratory	Desmond Cox and Anna-Maria Dittrich	
Rheumatology & Autoimmune Diseases	Nicola Ruperto	
RSV	Louis Bont	Expertise on effectiveness studies

How to apply?

You should fill in the online [application form](#), including motivation and add a short CV.

How is this work reimbursed?

The time that you spend on giving advice to c4c industry partners will be financially reimbursed. In case of providing advice to an academic requester academic recognition is the intended reimbursement for your time.

What are the timelines?

Deadline for applications is
Notification of acceptance

15 November 2024
December 2024
